Red Hat Enterprise Linux Release 9.2 Manual Pages on 'buildah-source-push.1' command

$ man buildah-source-push.1

buildah-source-push(1)   General Commands Manual   buildah-source-push(1)

NAME

   buildah-source-push - Push a source image from a specified path to a

   registry.

SYNOPSIS

   buildah source push [options] path registry

DESCRIPTION

   Push a source image from a specified path to a registry.

   Note that the buildah-source command and all its subcommands are exper?

   imental and may be subject to future changes.

OPTIONS

   --creds creds

   The [username[:password]] to use to authenticate with the registry if

   required. If one or both values are not supplied, a command line

   prompt will appear and the value can be entered. The password is en?

   tered without echo.

   --quiet, -q

   Suppress the progress output when pushing a source image.

   --tls-verify bool-value

   Require HTTPS and verification of certificates when talking to con?

   tainer registries (defaults to true). TLS verification cannot be used

   when talking to an insecure registry.
