

Red Hat Enterprise Linux Release 9.2 Manual Pages on 'enchant-lsmode-2.1' command

\$ man enchant-lsmode-2.1

ENCHANT-LSMOD-2(1) General Commands Manual ENCHANT-LSMOD-2(1)

NAME

Enchant - list provider and dictionary information

SYNOPSIS

enchant-lsmode-2 `[-lang|-word-chars] [language_tag][-list-dicts|-help|-version]`

DESCRIPTION

enchant-lsmode-2 gives information about Enchant's spell-checker providers and the dictionaries each offers. See `enchant-2(1)` for details about how the providers and dictionaries are located. If no command-line options are given, the available providers are listed.

OPTIONS

`-lang` Show which provider and dictionary will be used for the given language, or all languages if none is supplied.

`-word-chars`

Show the extra word characters for the given language, if available. This is of little interest to most users.

`-list-dicts`

List the provider and dictionary for all available languages.

`-help` Show brief help.

`-version`

Prints the program's version.
