GNU_GET_LIBC_VERSION(3) Linux Programmer's Manual GNU_GET_LIBC_VERSION(3)

NAME

gnu_get_libc_version, gnu_get_libc_release - get glibc version and release

SYNOPSIS

```
#include <gnu/libc-version.h>

const char *gnu_get_libc_version(void);

const char *gnu_get_libc_release(void);
```

DESCRIPTION

The function gnu_get_libc_version() returns a string that identifies the glibc version available on the system.

The function gnu_get_libc_release() returns a string indicates the release status of the glibc version available on the system. This will be a string such as stable.

VERSIONS

These functions first appeared in glibc in version 2.1.

ATTRIBUTES

For an explanation of the terms used in this section, see attributes(7).

??

?Interface ? Attribute ? Value ?

??

?gnu_get_libc_version(), ? Thread safety ? MT-Safe ?

?gnu_get_libc_release() ? ? ?

??

CONFORMING TO

These functions are glibc-specific.

EXAMPLES

When run, the program below will produce output such as the following:

```
$ ./a.out
```

```
GNU libc version: 2.8
```

```
GNU libc release: stable
```

Program source

```
#include <gnu/libc-version.h>

#include <stdlib.h>

#include <stdio.h>

int

main(int argc, char *argv[])

{

    printf("GNU libc version: %s\n", gnu_get_libc_version());

    printf("GNU libc release: %s\n", gnu_get_libc_release());

    exit(EXIT_SUCCESS);

}
```
