

Red Hat Enterprise Linux Release 9.2 Manual Pages on 'info.5' command

\$ man info.5

INFO(5) File Formats Manual INFO(5)

NAME

info - readable online documentation

DESCRIPTION

The Info file format is an easily-parsable representation for online documents. It can be read by emacs(1) and info(1) among other programs.

Info files are usually created from texinfo(5) sources by makeinfo(1), but can be created from scratch if so desired.

For a full description of the Texinfo language and associated tools, please see the Texinfo manual (written in Texinfo itself). Most likely, running this command from your shell:

info texinfo

or this key sequence from inside Emacs:

M-x info RET m texinfo RET

will get you there.

AVAILABILITY

<http://www.gnu.org/software/texinfo/>

REPORTING BUGS

Please send bug reports to bug-texinfo@gnu.org, general questions and discussion to help-texinfo@gnu.org.
