Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ppdi.1' command

$ man ppdi.1

ppdi(1)   Apple Inc.   ppdi(1)

NAME

   ppdi - import ppd files (deprecated)

SYNOPSIS

   ppdi [-I include-directory] [-o source-file] ppd-file [... ppd-

   file]

DESCRIPTION

   ppdi imports one or more PPD files into a PPD compiler source file.

   Multiple languages of the same PPD file are merged into a single

   printer definition to facilitate accurate changes for all localiza?

   tions.   This program is deprecated and will be removed in a future re?

   lease of CUPS.

OPTIONS

   ppdi supports the following options:

   -I include-directory

      Specifies an alternate include directory. Multiple -I options can

      be supplied to add additional directories.

   -o source-file

      Specifies the PPD source file to update. If the source file does

      not exist, a new source file is created. Otherwise the existing

      file is merged with the new PPD file(s) on the command-line. If

      no source file is specified, the filename ppdi.drv is used.

NOTES

PPD files are deprecated and will no longer be supported in a future feature release of CUPS. Printers that do not support IPP can be sup‐ported using applications such as ippeveprinter(1).
