Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ps2pdfwr.1' command

$ man ps2pdfwr.1

PS2PDFWR(1)   Ghostscript   PS2PDFWR(1)

NAME

    ps2pdfwr - Convert PostScript to PDF without specifying Compatibil?

    ityLevel, using ghostscript

SYNOPSIS

    ps2pdfwr [options...] {input.[e]ps|-} [output.pdf|-]

DESCRIPTION

    This wrapper script invokes gs(1) with following arguments

        -q -dNOPAUSE -dBATCH -sDEVICE=pdfwrite

    as well as the appropriate -dOutputFile argument, all preceded and fol?

    lowed by any command-line arguments. Finally, the security option

    -dSAFER is prepended before all the other options (This is now redun?

    dant as "SAFER" is now the default, but the option does no harm).

    The version-specific ps2pdf scripts all invoke this one with the addi?

    tion of the respective compatibility level option.

SEE ALSO

    gs(1), ps2pdf(1)

VERSION

    This document was last revised for Ghostscript version 9.54.0.
