Red Hat Enterprise Linux Release 9.2 Manual Pages on 'scsi_ready.8' command

$ man scsi_ready.8

SCSI_READY(8)   SG3_UTILS   SCSI_READY(8)

NAME

    scsi_ready - do SCSI TEST UNIT READY on devices

SYNOPSIS

    scsi_ready [--brief] [--help] [--verbose] DEVICE [DEVICE]*

DESCRIPTION

    This bash shell script calls the sg_turs utility on each given DEVICE.

    This will send a SCSI TEST UNIT READY command to each DEVICE. Disks,

    tape drives and DVD/BD players amongst others may respond to this SCSI

    command.

OPTIONS

    Arguments to long options are mandatory for short options as well.

    -b, --brief

        for each DEVICE given output a line containing either '

        ready' or '   device not ready'. If DEVICE is not found or

        there is another serious error then an error message will appear

        instead.

    -h, --help

        print out the usage message then exit.

    -v, --verbose

        increase level or verbosity.

EXIT STATUS

    The exit status of this script is 0 when it is successful. Otherwise

the exit status is that of the last sg_turs utility called. See the

sg3_utils(8) man page.
