

Red Hat Enterprise Linux Release 9.2 Manual Pages on 'switcheroctl.1' command

\$ man switcheroctl.1

SWITCHEROOCTL(1) User Commands SWITCHEROOCTL(1)

NAME

switcheroctl - Launch a command on a specific GPU

SYNOPSIS

switcheroctl help [COMMAND]

switcheroctl version

switcheroctl list

switcheroctl launch [OPTION] COMMAND...

DESCRIPTION

switcheroctl is a utility to launch a specific command on a specific GPU.

COMMANDS

help [COMMAND]

Displays a short synopsis of the available commands or provides detailed help on a specific command.

version

Prints the switcheroo-control version to which switcheroctl belongs.

list

List the known GPUs. The device number can be used to specify the GPU to launch on for the launch command. This is the default command if no commands are passed to switcheroctl.

launch [OPTION] COMMAND...

Launch COMMAND on a specific GPU. If no GPU are specified the first discrete (non-default) GPU is used, or the default GPU if there's no discrete GPU.

Options

`-g --gpu=GPU`

The GPU to launch on. The GPU identifier can be gathered using the `list` command.

EXIT STATUS

On success 0 is returned, a non-zero failure code otherwise.

`switcherooctl`

`SWITCHEROOCTL(1)`
