Red Hat Enterprise Linux Release 9.2 Manual Pages on 'umount.udisks2.8' command

$ man umount.udisks2.8

UMOUNT.UDISKS2(8)   System Administration   UMOUNT.UDISKS2(8)

NAME

   umount.udisks2 - unmount file systems that have been mounted by UDisks2

DESCRIPTION

   The umount.udisks2 program is a helper for the umount(8) program. Its

   purpose is to clean up automatically created directories created at

   file system mount-time. It should never be called directly.

AUTHOR

   This man page was originally written for UDisks2 by David Zeuthen

   <zeuthen@gmail.com> with a lot of help from many others.

BUGS

   Please send bug reports to either the distribution bug tracker or the

   upstream bug tracker at

   https://github.com/storaged-project/udisks/issues.
