Red Hat Enterprise Linux Release 9.2 Manual Pages on 'vdpa.8' command

\$ man vdpa.8

VDPA(8)

Linux

VDPA(8)

NAME

vdpa - vdpa management tool

SYNOPSIS

```
vdpa [ OPTIONS ] { dev|mgmtdev } { COMMAND | help }
```

OPTIONS

-V, --Version

Print the version of the vdpa utility and exit.

-j, --json

Generate JSON output.

-p, --pretty

When combined with -j generate a pretty JSON output.

OBJECT

dev - vdpa device.

mgmtdev

- vdpa management device.

COMMAND

Specifies the action to perform on the object. The set of possible ac?

tions depends on the object type. It is possible to show (or list)

objects. The help command is available for all objects. It prints out a

list of available commands and argument syntax conventions.

If no command is given, some default command is assumed. Usually it is

show or, if the objects of this class cannot be listed, help.

EXIT STATUS

Exit status is 0 if command was successful or a positive integer upon failure.

SEE ALSO
