Rocky Enterprise Linux 9.2 Manual Pages on command 'clevis-luks-unlock.1'

$ man clevis-luks-unlock.1

CLEVIS-LUKS-UNLOCK(1)   CLEVIS-LUKS-UNLOCK(1)

NAME

　　clevis-luks-unlock - Unlocks a LUKS device bound with a Clevis policy

SYNOPSIS

　　clevis luks unlock -d DEV [-n NAME] [-t SLT]

OVERVIEW

　　The clevis luks unlock command unlocks a LUKS device using its already

　　provisioned Clevis policy. For example:

　　　$ clevis luks unlock -d /dev/sda

OPTIONS

　　?　-d DEV : The LUKS device to unlock

　　?　-n NAME : The name to give the unlocked device node

　　?　-t SLT : Test the passphrase for the given slot without unlocking

　　　the device
