### ***Rocky Enterprise Linux 9.2 Manual Pages on command 'dnf-repoclosure.8'***

**\$ man dnf-repoclosure.8**

DNF-REPOCLOSURE(8)      dnf-plugins-core      DNF-REPOCLOSURE(8)

#### **NAME**

dnf-repoclosure - DNF repoclosure Plugin

Display a list of unresolved dependencies for repositories.

#### **SYNOPSIS**

dnf repoclosure [<options>]

#### **DESCRIPTION**

repoclosure is a program that reads package metadata from one or more repositories, checks all dependencies, and displays a list of packages with unresolved dependencies.

#### **Options**

All general DNF options are accepted, see Options in dnf(8) for details.

--arch <arch>

Query only packages for specified architecture, can be specified multiple times (default is all compatible architectures with your system). To run repoclosure for arch incompatible with your system use --forcearch=<arch> option to change basearch.

--best Check only the newest packages per arch.

--check <repoid>

Specify repo ids to check, can be specified multiple times (de? fault is all enabled).

--newest

Check only the newest packages in the repos.

--pkg <pkg-spec>

Check closure for this package only.

--repo <repoid>

Specify repo ids to query, can be specified multiple times (de? fault is all enabled).

## EXAMPLES

Display list of unresolved dependencies for all enabled repositories:

```
dnf repoclosure
```

Display list of unresolved dependencies for rawhide repository and packages with architecture noarch and x86\_64:

```
dnf repoclosure --repo rawhide --arch noarch --arch x86_64
```

Display list of unresolved dependencies for zmap package from rawhide repository:

```
dnf repoclosure --repo rawhide --pkg zmap
```

Display list of unresolved dependencies for myrepo, an add-on for the rawhide repository:

```
dnf repoclosure --repo rawhide --check myrepo
```
