

### ***Rocky Enterprise Linux 9.2 Manual Pages on command 'fc-pattern.1'***

**\$ man fc-pattern.1**

FC-PATTERN(1)

FC-PATTERN(1)

#### NAME

fc-pattern - parse and show pattern

#### SYNOPSIS

```
fc-pattern [ -cdVh ] [ --config ] [ --default ] [ [ -f format ] [
--format format ] ] [ --version ] [ --help ]
[ pattern [ element... ] ]
```

#### DESCRIPTION

fc-pattern parses pattern (empty pattern by default) and shows the parsed result. If --config is given, config substitution is performed on the pattern before being displayed. If --default is given, default substitution is performed on the pattern before being displayed. If any elements are specified, only those are printed.

#### OPTIONS

This program follows the usual GNU command line syntax, with long options starting with two dashes ('-'). A summary of options is included below.

-c Perform config substitution on pattern.

- d Perform default substitution on pattern.
- f Format output according to the format specifier format.
- V Show version of the program and exit.
- h Show summary of options.

pattern

Parses and displays pattern (uses empty pattern by default).

element

If set, the element property is displayed for parsed pattern.
