

? ? changed. ?

??

## OPTIONS

`--format`

Alter the output into a different format. The only valid format for podman image diff is json.

## EXAMPLE

```
$ podman diff redis:old
```

```
C /usr
```

```
C /usr/local
```

```
C /usr/local/bin
```

```
A /usr/local/bin/docker-entrypoint.sh
```

```
$ podman diff --format json redis:old redis:alpine
```

```
{
  "changed": [
    "/usr",
    "/usr/local",
    "/usr/local/bin"
  ],
  "added": [
    "/usr/local/bin/docker-entrypoint.sh"
  ]
}
```
