Rocky Enterprise Linux 9.2 Manual Pages on command 'ppdpo.1'

$ man ppdpo.1

ppdpo(1)   Apple Inc.   ppdpo(1)

NAME

    ppdpo - ppd message catalog generator (deprecated)

SYNOPSIS

    ppdpo [-D name[=value]] [-I include-directory] [-o output-file]

    source-file

DESCRIPTION

    ppdpo extracts UI strings from PPDC source files and updates either a

    GNU gettext or macOS strings format message catalog source file for

    translation. This program is deprecated and will be removed in a fu?

    ture release of CUPS.

OPTIONS

    ppdpo supports the following options:

-D name[=value]

    Sets the named variable for use in the source file. It is equiva?

    lent to using the #define directive in the source file.

-I include-directory

    Specifies an alternate include directory. Multiple -I options can

    be supplied to add additional directories.

-o output-file

    Specifies the output file. The supported extensions are .po or

    .po.gz for GNU gettext format message catalogs and .strings for

    macOS strings files.

NOTES

    PPD files are deprecated and will no longer be supported in a future

    feature release of CUPS. Printers that do not support IPP can be sup?

    ported using applications such as ippeveprinter(1).
