sane-hp3500(5)      SANE Scanner Access Now Easy      sane-hp3500(5)

#### **NAME**

sane-hp3500 - SANE backend for Hewlett-Packard ScanJet 3500 series  
scanners

#### **DESCRIPTION**

The sane-hp3500 library implements a SANE (Scanner Access Now Easy)  
backend that provides access to the following Hewlett-Packard USB  
flatbed scanners:

ScanJet 3500C  
ScanJet 3530C  
ScanJet 3570C

If you own a scanner other than the ones listed above that works with  
this backend, please let us know this by sending the scanner's exact  
model name and the USB vendor and device ids (e.g. from

/proc/bus/usb/devices, sane-find-scanner (1) or syslog) to us. Even if the scanner's name is only slightly different from the models mentioned above, please let us know.

## CONFIGURATION

None required.

## FILES

/usr/lib64/sane/libsane-hp3500.a

The static library implementing this backend.

/usr/lib64/sane/libsane-hp3500.so

The shared library implementing this backend (present on systems that support dynamic loading).

## ENVIRONMENT

SANE\_DEBUG\_HP3500 If the library was compiled with debug support enabled, this environment variable controls the debug level for this backend. Higher debug levels increase the verbosity of the output.

Example: export SANE\_DEBUG\_HP3500=4
