Rocky Enterprise Linux 9.2 Manual Pages on command 'tzselect.8'

\$ man tzselect.8

TZSELECT(8) Linux System Administration TZSELECT(8)

NAME

tzselect - select a timezone

SYNOPSIS

tzselect

DESCRIPTION

The tzselect program asks the user for information about the current location, and outputs the resulting timezone description to standard output. The output is suitable as a value for the TZ environment variable.

All interaction with the user is done via standard input and standard error.

EXIT STATUS

The exit status is zero if a timezone was successfully obtained from the user, and is nonzero otherwise.

ENVIRONMENT

AWK Name of a POSIX-compliant awk program (default: awk).

TZDIR Name of the directory containing timezone data files (default:

/usr/share/zoneinfo).

FILES

TZDIR/iso3166.tab

Table of ISO 3166 2-letter country codes and country names.

TZDIR/zone.tab

Table of country codes, latitude and longitude, TZ values, and descriptive comments.

TZDIR/TZ

Timezone data file for timezone TZ.
