VDOSETUUUID(8) System Manager's Manual VDOSETUUUID(8)

NAME

vdosetuuid - sets a new uuid for the vdo volume stored on a backing store

SYNOPSIS

vdosetuuid [options...] vdoBacking

DESCRIPTION

vdosetuuid sets a new uuid for the VDO volume stored on the vdoBacking device, whether the volume is running or not.

OPTIONS

--help Print this help message and exit.

--uuid Sets the uuid value that is stored in the VDO device. If not specified, the uuid is randomly generated.

--version

Show the version of vdosetuuid.

SEE ALSO

vdo(8).
