

## NAME

Apache::AuthCookie::Params::Base – Internal CGI AuthCookie Params Base Class

## VERSION

version 3.31

## SYNOPSIS

Internal Use Only!

## DESCRIPTION

This is the base class for AuthCookie Params drivers.

## METHODS

### **new(\$r)**

Constructor. This will generate either an internal Apache::AuthCookie::Params::CGI object, or, if available, use libapreq2. Note that libapreq2 will not be used if you turned on Encoding support because libapreq2 does not have any support for unicode.

## SOURCE

The development version is on github at <<https://github.com/mschout/apache-authcookie>> and may be cloned from <[git://github.com/mschout/apache-authcookie.git](https://github.com/mschout/apache-authcookie.git)>

## BUGS

Please report any bugs or feature requests on the bugtracker website <<https://github.com/mschout/apache-authcookie/issues>>

When submitting a bug or request, please include a test-file or a patch to an existing test-file that illustrates the bug or desired feature.
