## NAME

"Future::IO::Impl::IOAsync" – implement "Future::IO" using "IO::Async"

## DESCRIPTION

This module provides an implementation for Future::IO which uses IO::Async.

There are no additional methods to use in this module; it simply has to be loaded, and will provide the Future::IO implementation methods.

```
use Future::IO;
use Future::IO::Impl::IOAsync;

my $f = Future::IO->sleep(5);
...
```
