NAME

Lintian::Check::Info − Check script meta data

SYNOPSIS

```
use Lintian::Check::Info;
```

DESCRIPTION

This class represents Lintian checks.

CLASS METHODS

basedir

name

module

type

type_table

tag_table

load

$cs−>is_check_type ($type)

Returns a truth value if this check can be applied to a $type package.

Note if $cs−>type return undef, this will return a truth value for all inputs.

$cs−>add_taginfo ($taginfo)

Associates a tag as issued by this check.

$cs−>get_tag ($tagname)

Return the tag or undef (if the tag is not in this check).

$cs−>tags

Returns the list of tag names in the check. The list nor its contents should be modified.

$cs−>run_check ($proc, $group)
