\$ man XtCreateApplicationShell.3

XtCreateApplicationShell(3) XT COMPATIBILITY FUNCTIONS XtCreateApplicationShell(3)

NAME

XtCreateApplicationShell - create top-level widget instance

SYNTAX

```
#include <X11/Intrinsic.h>
```

```
Widget XtCreateApplicationShell(const char *name, WidgetClass widget_class, ArgList args,  
    Cardinal num_args);
```

ARGUMENTS

name Specifies the name of the shell.

args Specifies the argument list to override any other resource specifications.

num_args Specifies the number of arguments in the argument list.

DESCRIPTION

The procedure XtCreateApplicationShell calls XtAppCreateShell with the application NULL, the application class passed to XtInitialize, and the default application context created by XtInitialize. This routine has been replaced by XtAppCreateShell.
