

Linux Ubuntu 26.04 Manual Pages on command 'codepage.1'

\$ man codepage.1

CODEPAGE(1) General Commands Manual CODEPAGE(1)

NAME

codepage - extract a codepage from an MSDOS codepage file

SYNOPSIS

codepage [-c | -l | -L | -a | nnn] file.cpi

DESCRIPTION

The codepage command extracts codepages from an MSDOS codepage file.

OPTIONS

- c Input file is a single codepage
- L Print header info (you don't want to see this).
- l List all codepages contained in the file.
- a Extract all codepages from the file
- nnn (3 digits): extract codepage nnn from the file.

EXAMPLE

To create a file 850.cp, with codepage 850 from a file ega.cpi, execute:

```
codepage ega.cpi 850
```
