cpupower Manual

CPUPOWER-POWERCAP-INFO(1)

NAME

cpupower-powercap-info - Shows powercapping related kernel and hardware configurations

SYNOPSIS

cpupower powercap-info

DESCRIPTION

cpupower powercap-info shows kernel powercapping subsystem information. This needs hardware support and a loaded powercapping driver (at this time only intel_rapl driver exists) exporting hardware values userspace via sysfs.

Some options are platform wide, some affect single cores. By default values of core zero are displayed only. cpupower --cpu all cpufreq will show the settings of all cores, see cpupower(1) how to choose specific cores.

DOCUMENTATION

kernel sources: Documentation/power/powercap/powercap.rst
