

Linux Ubuntu 26.04 Manual Pages on command 'diffman-git.1'

\$ man diffman-git.1

diffman-git(1) General Commands Manual diffman-git(1)

NAME

diffman-git - compare changes to manual pages line by line

SYNOPSIS

diffman-git [diff-options ...] [[base-commit] commit]

DESCRIPTION

The diffman-git command formats a manual page at two git(1) commits, and then runs diff(1) on the formatted outputs.

If the commit is not specified, it diffs the working directory against HEAD.

If the base-commit is not specified, the comparison is done against the previous commit.

OPTIONS

- s Report when two files are the same.
- Un output n (default 3) lines of unified context.
- w Ignore all white space.

ENVIRONMENT

See man(1).

EXAMPLES

```
$ MAN_KEEP_FORMATTING= diffman-git 437e4afec6ca | less -R;
```

```
--- 437e4afec6ca^:man/man3/sem_open.3
```

```
+++ 437e4afec6ca:man/man3/sem_open.3
```

```
