

## ***Linux Ubuntu 26.04 Manual Pages on command 'docker-container-port.1'***

***\$ man docker-container-port.1***

DOCKER(1) Docker User Manuals DOCKER(1)

### NAME

docker-container-port - List port mappings or a specific mapping for the container

### SYNOPSIS

docker container port CONTAINER [PRIVATE\_PORT[/PROTO]]

### DESCRIPTION

List port mappings for the CONTAINER, or lookup the public-facing port that is NAT-ed to the PRIVATE\_PORT

### EXAMPLES

\$ docker ps

| CONTAINER ID | IMAGE          | COMMAND | CREATED        | STATUS        | PORTS                                               |
|--------------|----------------|---------|----------------|---------------|-----------------------------------------------------|
| NAMES        |                |         |                |               |                                                     |
| b650456536c7 | busybox:latest | top     | 54 minutes ago | Up 54 minutes | 0.0.0.0:1234->9876/tcp, 0.0.0.0:4321->7890/tcp test |

Find out all the ports mapped

\$ docker container port test

7890/tcp -> 0.0.0.0:4321

9876/tcp -> 0.0.0.0:1234

Find out a specific mapping

```
$ docker container port test 7890/tcp
```

```
0.0.0.0:4321
```

```
$ docker container port test 7890
```

```
0.0.0.0:4321
```

An example showing error for non-existent mapping

```
$ docker container port test 7890/udp
```

```
2014/06/24 11:53:36 Error: No public port '7890/udp' published for test
```
