

Linux Ubuntu 26.04 Manual Pages on command 'docker-search.1'

\$ man docker-search.1

DOCKER(1) Docker User Manuals DOCKER(1)

NAME

docker-search - Search Docker Hub for images

SYNOPSIS

docker search [OPTIONS] TERM

DESCRIPTION

Search Docker Hub for images that match the specified TERM. The table of images returned displays the name, description (truncated by default), number of stars awarded, whether the image is official, and whether it is automated.

Filter

Filter output based on these conditions:

- stars=
- is-automated=(true|false) (deprecated)
- is-official=(true|false)

EXAMPLES

Search Docker Hub for ranked images

Search a registry for the term 'fedora' and only display those images ranked 3 or higher:

\$ docker search --filter=stars=3 fedora

NAME	DESCRIPTION	STARS	OFFICIAL
fedora	Official Docker builds of Fedora	1150	[OK]

OPTIONS

-f, --filter= Filter output based on conditions provided

--format="" Pretty-print search using a Go template

--limit=0 Max number of search results

--no-trunc[=false] Don't truncate output
