

## ***Linux Ubuntu 26.04 Manual Pages on command 'fold.1'***

***\$ man fold.1***

FOLD(1)                      General Commands Manual                      FOLD(1)

### NAME

fold - Writes each file (or standard input if no files are given) to standard output whilst  
breaking long lines

### SYNOPSIS

fold [-b|--bytes] [-c|--characters] [-s|--spaces] [-w|--width] [-h|--help] [-V|--version]  
[file]

### DESCRIPTION

Writes each file (or standard input if no files are given) to standard output whilst break?  
ing long lines

### OPTIONS

-b, --bytes  
count using bytes rather than columns (meaning control characters such as newline are  
not treated specially)

-c, --characters  
count using character positions rather than display columns

-s, --spaces  
break lines at word boundaries rather than a hard cut-off

-w, --width <WIDTH>  
set WIDTH as the maximum line width rather than 80

-h, --help  
Print help

-V, --version

Print version

VERSION

v(uutils coreutils) 0.8.0
