FUSERMOUNT3(1) Filesystem in Userspace (FUSE) FUSERMOUNT3(1)

NAME

fusermount3 - mount and unmount FUSE filesystems

SYNOPSIS

fusermount3 [OPTIONS] MOUNTPOINT

DESCRIPTION

Filesystem in Userspace (FUSE) is a simple interface for userspace programs to export a virtual

filesystem to the Linux kernel. It also aims to provide a secure method for non-privileged

users to create and mount their own filesystem implementations.

fusermount3 is a program to mount and unmount FUSE filesystems. It should be called directly

only for unmounting FUSE file systems. To allow mounting and unmounting by unprivileged

users, fusermount3 needs to be installed set-uid root.

OPTIONS

-h print help.

-V print version.

-o OPTION[,OPTION...]

mount options.

-u unmount.

-q quiet.

-z lazy unmount.

SEE ALSO
