Git Manual

GIT-UPDATE-SERVER-INFO(1)

NAME

git-update-server-info - Update auxiliary info file to help dumb servers

SYNOPSIS

git update-server-info [-f | --force]

DESCRIPTION

A dumb server that does not do on-the-fly pack generations must have some auxiliary information files in \$GIT_DIR/info and \$GIT_OBJECT_DIRECTORY/info directories to help clients discover what references and packs the server has. This command generates such auxiliary files.

OPTIONS

-f, --force

Update the info files from scratch.

OUTPUT

Currently the command updates the following files. Please see gitrepository-layout(5) for a description of what they are for:

? objects/info/packs

? info/refs

GIT

Part of the git(1) suite
