

Linux Ubuntu 26.04 Manual Pages on command 'git-verify-commit.1'

\$ man git-verify-commit.1

GIT-VERIFY-COMMIT(1)	Git Manual	GIT-VERIFY-COMMIT(1)
----------------------	------------	----------------------

NAME

git-verify-commit - Check the GPG signature of commits

SYNOPSIS

git verify-commit [-v | --verbose] [--raw] <commit>...

DESCRIPTION

Validates the GPG signature created by git commit -S on the commit objects given on the command line.

OPTIONS

--raw

Print the raw gpg status output to standard error instead of the normal human-readable output.

-v, --verbose

Print the contents of the commit object before validating it.

GIT
