

Linux Ubuntu 26.04 Manual Pages on command 'gnome-session-quit.1'

\$ man gnome-session-quit.1

GNOME-SESSION-QUIT(1)

User Commands

GNOME-SESSION-QUIT(1)

NAME

gnome-session-quit - End the current GNOME session

SYNOPSIS

gnome-session-quit [OPTION...]

DESCRIPTION

gnome-session-quit can be used to end a GNOME session.

OPTIONS

-h, --help

Print help and exit

--logout

Prompt the user to confirm logout. This is the default behavior. Cannot be combined with

--power-off or --reboot.

--power-off

Prompt the user to confirm system power off. Cannot be combined with --logout or

--reboot.

--reboot

Prompt the user to confirm system reboot. Cannot be combined with --logout or

--power-off.

--force

Ignore any inhibitors.

--no-prompt

End the session without user interaction. This only works with --logout.
