

Linux Ubuntu 26.04 Manual Pages on command 'go-fix.1'

\$ man go-fix.1

GO-FIX(1) Go programming tools and commands GO-FIX(1)

NAME

go-fix - update packages to use new APIs

SYNOPSIS

go fix [build flags] [-fixtool prog] [fix flags] [packages]

DESCRIPTION

Fix runs the Go fix tool (cmd/fix) on the named packages and applies suggested fixes.

OPTIONS

It supports these flags:

-diff instead of applying each fix, print the patch as a unified diff

The -fixtool=prog flag selects a different analysis tool with alternative or additional fix?

ers; see the documentation for go vet?s -vettool flag for details.

The default fix tool is 'go tool fix' or cmd/fix. For help on its fixers and their flags, run 'go tool fix help'. For details of a specific fixer such as 'hostport', see 'go tool fix help hostport'.

For more about specifying packages, see 'go help packages'.

The build flags supported by go fix are those that control package resolution and execution, such as -C, -n, -x, -v, -tags, and -toolexec. For more about these flags, see 'go help build'.

SEE ALSO

go fmt(1), go vet(1).

AUTHOR

This manual page was created using help2man and afterwards updating the output. It is main?

tained by the Debian Go Compiler Team <team+go-compiler@tracker.debian.org> for the Debian project (and may be used by others).

Go 1.26
