

Linux Ubuntu 26.04 Manual Pages on command 'go-mod.1'

\$ man go-mod.1

GO-MOD(1) Go programming tools and commands GO-MOD(1)

NAME

go-mod - module maintenance

SYNOPSIS

go mod command [arguments]

DESCRIPTION

Go mod provides access to operations on modules.

Note that support for modules is built into all the go commands, not just `go mod'. For ex?

ample, day-to-day adding, removing, upgrading, and downgrading of dependencies should be done using `go get'. See `go help modules' for an overview of module functionality.

COMMANDS

download

download modules to local cache

edit edit go.mod from tools or scripts

graph print module requirement graph

init initialize new module in current directory

tidy add missing and remove unused modules

vendor make vendored copy of dependencies

verify verify dependencies have expected content

why explain why packages or modules are needed

Use ?go help mod <command>? for more information about a command.

AUTHOR

This manual page was created using help2man and afterwards updating the output. It is main?

tained by the Debian Go Compiler Team <team+go-compiler@tracker.debian.org> for the Debian project (and may be used by others).
