

Linux Ubuntu 26.04 Manual Pages on command 'infobrowser.1'

\$ man infobrowser.1

INFO(1) User Commands INFO(1)

NAME

info - read Info documents

SYNOPSIS

info [OPTION]... [MENU-ITEM...]

DESCRIPTION

Read documentation in Info format.

Frequently-used options:

-a, --all

use all matching manuals

-k, --apropos=STRING

look up STRING in all indices of all manuals

-d, --directory=DIR

add DIR to INFOPATH

-f, --file=MANUAL

specify Info manual to visit

-h, --help

display this help and exit

--index-search=STRING

go to node pointed by index entry STRING

-n, --node=NODENAME

specify nodes in first visited Info file

-o, --output=FILE

output selected nodes to FILE

--subnodes

recursively output menu items

-v, --variable VAR=VALUE

assign VALUE to Info variable VAR

--version

display version information and exit

-w, --where, --location

print physical location of Info file

The first non-option argument, if present, is the menu entry to start from; it is searched for in all 'dir' files along INFOPATH. If it is not present, info merges all 'dir' files and shows the result. Any remaining arguments are treated as the names of menu items relative to the initial node visited.

For a summary of key bindings, type H within Info.

EXAMPLES

info show top-level dir menu

info info-std

show the manual for this Info program

info emacs

start at emacs node from top-level dir

info emacs buffers

select buffers menu entry in emacs manual

info emacs -n Files

start at Files node within emacs manual

info '(emacs)Files'

alternative way to start at Files node

info --subnodes -o out.txt emacs

dump entire emacs manual to out.txt

info -f ./foo.info

show file ./foo.info, not searching dir

REPORTING BUGS

Email bug reports to bug-texinfo@gnu.org, general questions and discussion to help-tex@gnu.org.

info@gnu.org.

SEE ALSO

The full documentation for info is maintained as a Texinfo manual. If the info program is
properly installed at your site, the command
info info
should give you access to the complete manual. (Or, if you have Emacs, M-x info will lead
to the manual.)
