memccpy(3) Library Functions Manual memccpy(3)

NAME _____

memccpy - copy memory area

LIBRARY

Standard C library (libc, -lc)

SYNOPSIS

```
#include <string.h>
```

```
void *memcpy(size_t n;  
             void dest[restrict n], const void src[restrict n],  
             int c, size_t n);
```

DESCRIPTION

The `memccpy()` function copies no more than `n` bytes from memory area `src` to memory area `dest`, stopping when the character `c` is found (`c` is copied).

If the memory areas overlap, the results are undefined.

RETURN VALUE

The `memccpy()` function returns a pointer to the next character in `dest` after `c`, or `NULL` if `c` was not found in the first `n` characters of `src`.

ATTRIBUTES

For an explanation of the terms used in this section, see `attributes(7)`.

[illegible]

?	Interface	?	Attribute	?	Value	?
---	-----------	---	-----------	---	-------	---

[illegible]

? memccpy() ? Thread safety ? MT-Safe ?
