

Linux Ubuntu 26.04 Manual Pages on command 'mq_getsetattr.2'

\$ man mq_getsetattr.2

mq_getsetattr(2) System Calls Manual mq_getsetattr(2)

NAME

mq_getsetattr - get/set message queue attributes

SYNOPSIS

```
#include <mqueue.h>                /* Definition of struct mq_attr */  
  
#include <sys/syscall.h>        /* Definition of SYS_* constants */  
  
#include <unistd.h>  
  
int syscall(SYS_mq_getsetattr, mqd_t mqdes,  
             const struct mq_attr *newattr, struct mq_attr *oldattr);
```

DESCRIPTION

Do not use this system call.

This is the low-level system call used to implement mq_getattr(3) and mq_setattr(3). For an explanation of how this system call operates, see the description of mq_setattr(3).

STANDARDS

None.

NOTES

Never call it unless you are writing a C library!
