

Linux Ubuntu 26.04 Manual Pages on command 'netaddr.1'

\$ man netaddr.1

NETADDR(1) General Commands Manual NETADDR(1)

NAME

netaddr - interactive shell for netaddr Python library

DESCRIPTION

This manual page documents briefly the netaddr command. This manual page was written for the Debian distribution because the original program does not have a manual page.

netaddr is a Python library for the manipulation of various common network address notations and representations.

The netaddr command provides an interactive shell based on ipython allowing to work in a special environment where all netaddr related commands are available without additional imports.

OPTIONS

Any option accepted by ipython is accepted by netaddr.

SEE ALSO
