\$ man npm-login.1

NPM-LOGIN(1)

General Commands Manual

NPM-LOGIN(1)

NAME

npm-login

Synopsis

<!-- AUTOGENERATED USAGE DESCRIPTIONS -->

Note: This command is unaware of workspaces.

Description

Verify a user in the specified registry, and save the credentials to the .npmrc file. If no registry is specified, the default registry will be used (see config).

When using legacy for your auth-type, the username and password, are read in from prompts.

To reset your password, go to <https://www.npmjs.com/forgot>

To change your email address, go to <https://www.npmjs.com/email-edit>

You may use this command multiple times with the same user account to authorize on a new machine. When authenticating on a new machine, the username, password and email address must all match with your existing record.
