\$ man npm-restart.1

NPM-RESTART(1)

General Commands Manual

NPM-RESTART(1)

NAME

npm-restart

Synopsis

<!-- AUTOGENERATED USAGE DESCRIPTIONS -->

Description

This restarts a project. It is equivalent to running `npm run-script restart`.

If the current project has a `"restart"` script specified in `package.json`, then the following scripts will be run:

? prerestart

? restart

? postrestart

If it does not have a `"restart"` script specified, but it does have `stop` and/or `start` scripts, then the following scripts will be run:

? prerestart

? prestop

? stop

? poststop

? prestart

? start

? poststart

? postrestart

Configuration

<!-- AUTOGENERATED CONFIG DESCRIPTIONS -->

See Also

? npm run-script

? npm scripts

? npm test

? npm start

? npm stop

? npm restart
