

Linux Ubuntu 26.04 Manual Pages on command 'npm-stop.1'

\$ man npm-stop.1

NPM-STOP(1)

General Commands Manual

NPM-STOP(1)

NAME

npm-stop

Synopsis

<!-- AUTOGENERATED USAGE DESCRIPTIONS -->

Description

This runs a predefined command specified in the "stop" property of a package's "scripts" object.

Unlike with npm start, there is no default script that will run if the "stop" property is not defined.

Example

```
{
  "scripts": {
    "stop": "node bar.js"
  }
}
```

npm stop

> npm@x.x.x stop

> node bar.js

(bar.js output would be here)

Configuration
