

Linux Ubuntu 26.04 Manual Pages on command 'npm-test.1'

\$ man npm-test.1

NPM-TEST(1)

General Commands Manual

NPM-TEST(1)

NAME

npm-test

Synopsis

<!-- AUTOGENERATED USAGE DESCRIPTIONS -->

Description

This runs a predefined command specified in the "test" property of a package's "scripts" object.

Example

```
{
  "scripts": {
    "test": "node test.js"
  }
}
```

npm test

> npm@x.x.x test

> node test.js

(test.js output would be here)

Configuration
