\$ man nproc.1

NPROC(1)

General Commands Manual

NPROC(1)

NAME

nproc - Print the number of cores available to the current process. If the OMP_NUM_THREADS or OMP_THREAD_LIMIT environment variables are set, then they will determine the minimum and maximum returned value respectively.

SYNOPSIS

nproc [--all] [--ignore] [-h|--help] [-V|--version]

DESCRIPTION

Print the number of cores available to the current process. If the OMP_NUM_THREADS or OMP_THREAD_LIMIT environment variables are set, then they will determine the minimum and maximum returned value respectively.

OPTIONS

--all print the number of cores available to the system

--ignore <N>

ignore up to N cores

-h, --help

Print help

-V, --version

Print version

VERSION

v(utils coreutils) 0.8.0
