

## ***Linux Ubuntu 26.04 Manual Pages on command 'pdfunite.1'***

### ***\$ man pdfunite.1***

pdfunite(1)                      General Commands Manual                      pdfunite(1)

#### NAME

pdfunite - Portable Document Format (PDF) page merger

#### SYNOPSIS

pdfunite [options] PDF-sourcefile1..PDF-sourcefileN PDF-destfile

#### DESCRIPTION

pdfunite merges several PDF (Portable Document Format) files in order of their occurrence on command line to one PDF result file.

Neither of the PDF-sourcefile1 to PDF-sourcefileN should be encrypted.

#### OPTIONS

- v    Print copyright and version information.
- h    Print usage information. (-help and --help are equivalent.)

#### EXAMPLE

pdfunite sample1.pdf sample2.pdf sample.pdf

merges all pages from sample1.pdf and sample2.pdf (in that order) and creates sample.pdf

#### AUTHOR

The pdfunite software and documentation are copyright 1996-2004 Glyph & Cog, LLC and copy?right 2005-2011 The Poppler Developers - <http://poppler.freedesktop.org>
