

Linux Ubuntu 26.04 Manual Pages on command 'ppdhtml.1'

\$ man ppdhtml.1

ppdhtml(1) OpenPrinting ppdhtml(1)

NAME

ppdhtml - cups html summary generator (deprecated)

SYNOPSIS

ppdhtml [-D name[=value]] [-I include-directory] source-file

DESCRIPTION

ppdhtml reads a driver information file and produces a HTML summary page that lists all of the drivers in a file and the supported options. This program is deprecated and will be re? moved in a future release of CUPS.

OPTIONS

ppdhtml supports the following options:

-D name[=value]

Sets the named variable for use in the source file. It is equivalent to using the #de? fine directive in the source file.

-I include-directory

Specifies an alternate include directory. Multiple -I options can be supplied to add additional directories.

NOTES

PPD files are deprecated and will no longer be supported in a future feature release of CUPS. Printers that do not support IPP can be supported using applications such as `ippeveprinter(1)`.
