\$ man pw-mididump.1

pw-mididump(1)

General Commands Manual

pw-mididump(1)

NAME

pw-mididump - The PipeWire MIDI dump

SYNOPSIS

pw-mididump [options] [FILE]

DESCRIPTION

Dump MIDI messages to stdout.

When a MIDI file is given, the events inside the file are printed.

When no file is given, pw-mididump creates a PipeWire MIDI input stream and will print all

MIDI events received on the port to stdout.

OPTIONS

-r | --remote=NAME

The name the remote instance to monitor. If left unspecified, a connection is made to the default PipeWire instance.

-h | --help

Show help.

--version

Show version information.
