

Linux Ubuntu 26.04 Manual Pages on command 'rust-true.1'

\$ man rust-true.1

TRUE(1) General Commands Manual TRUE(1)

NAME

true - Returns true, a successful exit status.

Immediately returns with the exit status 0, except when invoked with one of the recognized options. In those cases it will try to write the help or version text. Any IO error during this operation causes the program to return 1 instead.

SYNOPSIS

true [--help] [--version]

DESCRIPTION

Returns true, a successful exit status.

Immediately returns with the exit status 0, except when invoked with one of the recognized options. In those cases it will try to write the help or version text. Any IO error during this operation causes the program to return 1 instead.
