

Linux Ubuntu 26.04 Manual Pages on command 'streq.3'

\$ man streq.3

streq(3)

Library Functions Manual

streq(3)

NAME _____

streq - strings equal

LIBRARY

gnulib - The GNU Portability Library

SYNOPSIS

```
#include <string.h>
```

```
bool streq(const char *s1, const char *s2);
```

DESCRIPTION

streq() determines whether the strings s1 and s2 are equal.

RETURN VALUE

`streq()` returns true if and only if the strings `s1` and `s2` are equal.

ATTRIBUTES

For an explanation of the terms used in this section, see `attributes(7)`.

[illegible]

?	Interface	?	Attribute	?	Value	?
---	-----------	---	-----------	---	-------	---

[illegible]

? streq() ? Thread safety ? MT-Safe ?

[illegible]

STANDARDS

GNU.

HISTORY

gnulib 202601.
