\$ man tee.1

TEE(1) General Commands Manual TEE(1)

NAME

tee - Copy standard input to each FILE, and also to standard output.

SYNOPSIS

tee [-h|--help] [-a|--append] [-i|--ignore-interrupts] [-p] [--output-error] [-V|--version]
[file]

DESCRIPTION

Copy standard input to each FILE, and also to standard output.

OPTIONS

-h, --help

Print help

-a, --append

append to the given FILEs, do not overwrite

-i, --ignore-interrupts

ignore interrupt signals (ignored on non-Unix platforms)

-p set write error behavior (ignored on non-Unix platforms)

--output-error

set write error behavior

Possible values:

? warn: produce warnings for errors writing to any output

? warn-nopipe: produce warnings for errors that are not pipe errors (ignored
on non-unix platforms)

? exit: exit on write errors to any output

? exit-nopipe: exit on write errors to any output that are not pipe errors

(equivalent to exit on non-unix platforms)

-V, --version

Print version

[file]

EXTRA

If a FILE is -, it refers to a file named - .

VERSION

v(uutils coreutils) 0.8.0

2026-04-16
