wcscmp(3) Library Functions Manual wcscmp(3)

NAME _____

wcsncmp - compare two wide-character strings

LIBRARY

Standard C library (libc, -lc)

SYNOPSIS

```
#include <wchar.h>
```

```
int wcscmp(const wchar_t *s1, const wchar_t *s2);
```

DESCRIPTION

The `wcscmp()` function is the wide-character equivalent of the `strcmp(3)` function. It compares the wide-character string pointed to by `s1` and the wide-character string pointed to by `s2`.

RETURN VALUE

The `wcsncmp()` function returns zero if the wide-character strings at `s1` and `s2` are equal. It returns an integer greater than zero if at the first differing position `i`, the corresponding wide-character `s1[i]` is greater than `s2[i]`. It returns an integer less than zero if at the first differing position `i`, the corresponding wide-character `s1[i]` is less than `s2[i]`.

ATTRIBUTES

For an explanation of the terms used in this section, see `attributes(7)`.
